

TOLUWANI ERIJESU DANIEL

Front-End Web Developer

Lagos, Nigeria | +234 912 845 3751 | toluwanierijesu@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Front-End Developer experienced in building responsive, accessible web applications with HTML5, CSS3, JavaScript (ES6+), and React. Skilled at translating UI/UX designs into clean, performant interfaces and collaborating within cross-functional teams using Git workflows. Brings strong analytical and communication skills from prior research training and classroom teaching experience.

TECHNICAL SKILLS

Languages & Markup: HTML5, CSS3, JavaScript (ES6+)

Frameworks & Libraries: React (Hooks, JSX, useState, useEffect), Vite

Styling: CSS Flexbox, CSS Grid, Responsive Design, BEM Methodology

Tools & Platforms: Git, GitHub, VS Code, Netlify, StackBlitz, Figma

PROJECTS

Solar System Web Application

May 2026

Frontend Lead — Group 15 Capstone Project, TS Academy (Phoenix Cohort)

- Led frontend coordination for a 12-member team, architecting shared component structure (Header, Hero, PlanetGrid, VideoSection, Table, ContactForm, Footer) in React.
- Diagnosed and resolved a critical Netlify deployment failure caused by file-system case-sensitivity mismatches between Windows and Linux via a Git cache reset.
- Reviewed and debugged core component logic; authored project README documentation and enforced consistent branching and pull request practices across the team.

Arewa-Okunrin — Men's E-Commerce Store

Personal Project — HTML, CSS, JavaScript

- Designed and built a fully responsive e-commerce storefront with product grids, a pricing section, and a functional hamburger navigation menu.
- Applied an editorial, high-end black-and-gold visual design system to align with the men's fashion brand identity.

EDUCATION

Bachelor of Arts — History & Strategic Studies

2023 – 2027 (Expected)

University of Lagos, Lagos, Nigeria
